Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Claim 1: on Line 2, following the word module insert the following: --- to achieve real time driving ---.

Claim 6: on Line 2, following the word module insert the following: --- to achieve real time driving ---.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Joe McKinney Muncy on 11.16.05.

Allowable Subject Matter

2. Claims 1-2, 6-7 allowed.

3. The following is an examiner's statement of reasons for allowance:

None of the cited references teaches or suggests a method of processing signals of a timing controller of a liquid crystal display module to achieve real time driving that comprises steps of:

(a) receiving a vertical synchronizing signal;

(b) receiving a data enable signal DE which has a vertical blank period;

(c) generating a gate clock signal CPV which has a plurality of gate clock cycles C1-Cn;

(d) after a rising edge or a falling edge of the vertical synchronizing signal, generating a plurality of gate-on enable signals OE simultaneously according to the plurality of gate clock cycles C1-Cn of the gate clock signal CPV;

(e) after a rising edge or a falling edge of the vertical synchronizing signal, generating start vertical signals STV before the end of the vertical blank period VB and after at least a gate clock cycle C1 during the vertical blank period VB wherein the start vertical signals STV includes a first start vertical signal STV1 to determine a start scan location of a frame and a second start vertical signal STV2 to offset flicker and display brightness of the liquid display;
and

(f) after generating the start vertical signals STV, pausing output of CPV, STV1 and OE until the end of the vertical blank period VB. so as to process control signals in real time so that real time driving is achieved, as disclosed in claim 1. The closest art (APA, Herman and Taguchi) disclose a timing controller of a liquid crystal display module, either singularly or in combination fail to anticipate suggest these limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
